Forget everything you know about refugee legal processes.

Problem

It takes UNHCR pro-bono lawyers too long to research specific laws for a given case

Problem

It takes pro-bono lawyers too long to research specific laws for a given case

Make researching laws faster

Provide a platform for lawyers

remember previous cases
and the laws that led to decisions

https://help-os-frontend.vercel.app/case-profile

Thank you for your attention, we hope you liked our app

Not let the tremendous work done by pro bono lawyers go to waste.

By providing a platform we can ensure they spend their time on the human aspects of refugee legal work.

Bonus slide: Why not LLM

- Sensitive nature of refugee status requires deterministic decision-making
- LLM might be helpful for looking up information faster
- Privacy issues

Our app could be extended to suggest similar cases using an LLM

Bonus slide: Link with pre existing Law-database

Preferably yes, did not do due to time constraint

Could also import previous cases from a database to the app
